tara

*A little guidance. A lot of care.*

BRAND IDENTITY GUIDELINES

# How tara looks, sounds and moves

Logo · Colour · Typography · Iconography · Imagery · Layout · Motion · Voice

# A calm companion for every pregnancy

tara is a maternal-health companion for rural India. It helps three people around one pregnancy: the **mother**, who wants to understand her week and feel looked after; the **ASHA worker**, who visits her and runs the voice check-in with **Sakhi**; and the **PHC doctor**, who reviews the results and acts on risk.

### Mission

Catch danger early and make every mother feel cared for, in her own language, on a basic phone, with or without good internet.

### Promise

Simple guidance she can act on today. Nothing that frightens her. Clinical detail goes to the people who can act on it.

### Tagline

*A little guidance.*
*A lot of care.*

## Personality

**Warm**
Speaks like a kind elder sister. "Amma", not "user".

**Calm**
Soft colours, settling motion, no red alarms for mothers.

**Clear**
One idea per card, plain words, big tap targets.

**Trustworthy**
Medically grounded, private by default, never guesses.

## The names

**tara** तारा ತಾರಾ

"Star". A steady guiding light for nine months and beyond: always there, never loud. The name is short, easy to say in every Indian language, and feminine.

**Sakhi** सखी ಸಖಿ

"Companion, close friend". The voice that sits beside the ASHA worker and asks the 24 check-in questions, listening patiently in the mother's language.

# Three people, one pregnancy

## Who sees what

| AUDIENCE | WHAT TARA GIVES THEM | TONE |
|---|---|---|
| **Mother** | Her week (baby size and milestone), daily checklist from her ASHA, medicines, next visit, history papers, Ask Tara. | Warm, reassuring, no risk labels |
| **ASHA worker** | Her mothers sorted by risk, the 24-question Sakhi voice check-in, each mother's checklist editor, summaries. | Practical, direct, action-first |
| **Doctor** | Cases, rule hits, transcripts, vitals, referral actions. | Clinical, precise, dense |

## Brand architecture

| NAME | WHAT IT IS | WHO USES IT |
|---|---|---|
| **tara** | The master brand and the app | Everyone |
| **Sakhi** | The AI voice check-in (24 questions, rule-based risk screening) | ASHA worker, with the mother |
| **Ask Tara** | The mother's question companion (text, voice input) | Mother |
| **Care Circle** | Her people: ASHA, PHC doctor, 108 ambulance | Mother |

Sub-brands never get their own logo or colour scheme. They are names inside tara, set in Anek with the shared palette.

# The logo

A lowercase wordmark that grows into a woman's figure and a single blush leaf: care that is personal, rooted and growing.

### Anatomy

- **Wordmark "tara"**: always lowercase, in Rose #A9636D. Soft, high-contrast serifless letters.
- **The figure**: a woman with eyes closed, face lifted, at peace. She rises from the last "a".
- **The leaf**: one blush leaf #E8B4BC, the seed of care. It is also tara's symbol on its own.

### The leaf mark

Used alone for the splash screen, the loading pulse and small spaces. It "plants", breathes and travels into the wordmark in the brand intro.

## Clear space and minimum size

### Clear space

Keep empty space on every side equal to the height of the letter "a". Nothing (text, edges, other marks) enters it.

### Minimum size

Full logo: 96 pt (25 mm print) wide. Leaf mark: 16 pt. Below that, use the leaf alone.

### Backgrounds

Porcelain #FEFAF4, White, Cherry mist #F7E4E8 or Shell. Never on photos or busy art.

## Misuse

**DON'T**

Recolour the wordmark (no cherry, black or gradients).

**DON'T**

Stretch, rotate, skew or re-space the letters.

**DON'T**

Add shadows, outlines, glows or 3D effects.

**DON'T**

Separate the figure from the wordmark, or capitalise "Tara" in the logo.

In running text the product name is written **tara** in brand moments and **Tara** at the start of a sentence or as the assistant's name ("Ask Tara"). The ASHA voice assistant is always **Sakhi**.

# Colour

Built from the logo itself: its cream paper, its rose wordmark and its blush leaf, with one deep cherry reserved for actions.

## Core palette

**Porcelain**
#FEFAF4
App canvas, every screen

**Rose**
#A9636D
Wordmark, orb. Decorative, never text

**Blush**
#E8B4BC
Leaf, accents, rings. Never text

**Cherry**
#A11D44
Primary actions. White on it 7.6:1 (AAA)

## Accents (one per topic)

**Pumpkin**
#C84B00
Maternity, warm 2nd accent. 4.9:1

**Plum**
#5B2A86
Reproductive health, next visit

**Sage**
#2F6B4F
Fertility, "all good", done. 6.3:1

**Cherry pressed**
#861636
Pressed state of primary

## Contrast (WCAG 2.2)

| PAIR | RATIO | USE |
|---|---|---|
| Ink on Porcelain | **15.8 : 1** | All headings and body (AAA) |
| White on Cherry | **7.6 : 1** | Primary buttons (AAA) |
| Sage on White | **6.3 : 1** | "All good", done states (AA) |
| Muted on Porcelain | **6.1 : 1** | Secondary text (AA) |
| Pumpkin on White | **4.9 : 1** | Reminders, labels (AA) |
| Outline on Porcelain | **3.3 : 1** | Control borders only (non-text 3:1) |

# Colour in use

## Surfaces and tints

| Surface | Shell | Mist | Band | Orange | Rose | Lilac | Sage |
|---|---|---|---|---|---|---|---|
| #FFFFFF | #FBF4F1 | #F7E4E8 | #FAF1EC | #FFF5F0 | #FDF0F5 | #F4EEFA | #EEF6F1 |

## Mother's weekly grid (only here)

| Blossom pink | Peach nectar | Lavender milk | Pistachio cream |
|---|---|---|---|
| #FCEEF2 | #FDF0E6 | #F5EFFB | #EEF6F0 |
| Baby's senses | Her body and comfort | Nourishment | Clinic care |

### Text colours

| | |
|---|---|
| Ink #2B1B21 | Headings, body. 15.8:1 |
| Muted #6F5A61 | Secondary text. 6.1:1 (AA) |
| Subtle #A3929A | Disabled, decoration only |
| Outline #9A858C | Control borders. 3.3:1 |

### Proportion (60 / 30 / 10)

60 % porcelain and white space, 30 % soft tints and cards, 10 % cherry, only on the one thing to do next.

- One primary (cherry) button per screen.
- One accent hue per card, never two.
- Rose and blush are never used for readable text.

## Colour by meaning

| MEANING | COLOUR | EXAMPLE |
|---|---|---|
| The next action | Cherry | "See my day", "Save", "Start check-in" |
| Done, healthy, all good | Sage | "All done for today", taken medicine |
| Time and dates | Plum on Lilac | "Next visit · 22 Oct" |
| Gentle reminder | Pumpkin | "Refill soon · 3 days left", progress dots |
| Risk (ASHA and doctor only) | Cherry on Mist | "High risk", rule hits. Never shown to mothers |
| Selected | Rose tint | Active tab capsule, selected rows |

# Typography

Two families, chosen by how much attention a piece of text deserves. **Anek** carries everything people read or act on, in one design across English, ಕನ್ನಡ and हिंदी. **Parisienne** is ornament only.

PRIMARY · ANEK

**Aa ಅಆ अआ**

Anek Latin, Anek Kannada, Anek Devanagari · 400 Regular, 500 Medium, 600 SemiBold, 700 Bold · Google Fonts, OFL

ನಮಸ್ಕಾರ ಅಮ್ಮಾ, ಇದು ನಾನು
नमस्ते अम्मा, यह मैं हूँ

DECORATIVE · PARISIENNE

*A lot of care*

Parisienne 400 · Latin only · brand moments and taglines only, never information. Never smaller than 26 pt.

## One voice, three scripts

| | |
|---|---|
| English | **Amma, this is me at week 30!** |
| ಕನ್ನಡ | **ಅಮ್ಮಾ, ಇದು 30ನೇ ವಾರದ ನಾನು!** |
| हिंदी | **अम्मा, यह 30वें हफ़्ते का मैं हूँ!** |

Text is split into script runs automatically, so mixed lines ("Week 30 · ಕನ್ನಡ") always use the right Anek cut.

## Rules

- **Weight carries focus.** The more someone must see or act on it, the heavier it is (Act 600–700, Orient 700, Read 400–500, Glance 400–500).
- Body text never below 17 pt for mothers; captions 14 pt minimum.
- Indic line heights are generous (tall matras, below-base forms). Never track Kannada or Devanagari.
- Sentence case everywhere. UPPERCASE only for overlines with +1.2 tracking.
- Titles wrap; they are never truncated. Card text may truncate with "..."; the full text lives in the sheet.
- Numbers that matter (weeks, kg, dates) use Metric or Body strong.

# Type scale

Sizes in pt · line height · weight · tracking. Line heights are tuned for Indic scripts.

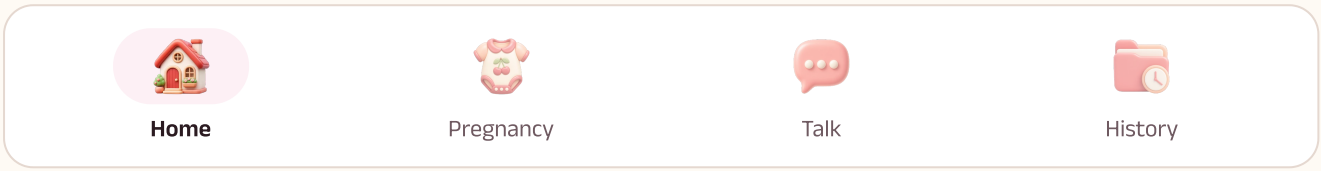

## Scale

| | | |
|---|---|---|
| DISPLAY | **Care begins with you.** | 32 / 40 · 700 · −0.64 |
| TITLE (H1) | **Your pregnancy** | 26 / 34 · 700 · −0.4 |
| HEADING (H2) | **Today's checklist** | 19 / 26 · 700 · −0.2 |
| METRIC | **Week 30** | 28 / 34 · 700 · −0.3 |
| BUTTON | **See my day** | 18 / 24 · 600 · +0.1 |
| INPUT | Type your question | 18 / 24 · 500 |
| BODY | Rest on your left side after lunch. | 17 / 25 · 400 |
| BODY STRONG | **Iron + Folic acid · 1 tablet** | 17 / 25 · 700 |
| LABEL | **Phone number** | 15 / 22 · 600 |
| CAPTION | Hosahalli PHC · with Sunita | 14 / 20 · 500 |
| OVERLINE | NEXT VISIT | 12 / 16 · 600 · +1.2 |
| TAGLINE | *A little guidance.* | 30 / 40 · Parisienne |

# Clay icons

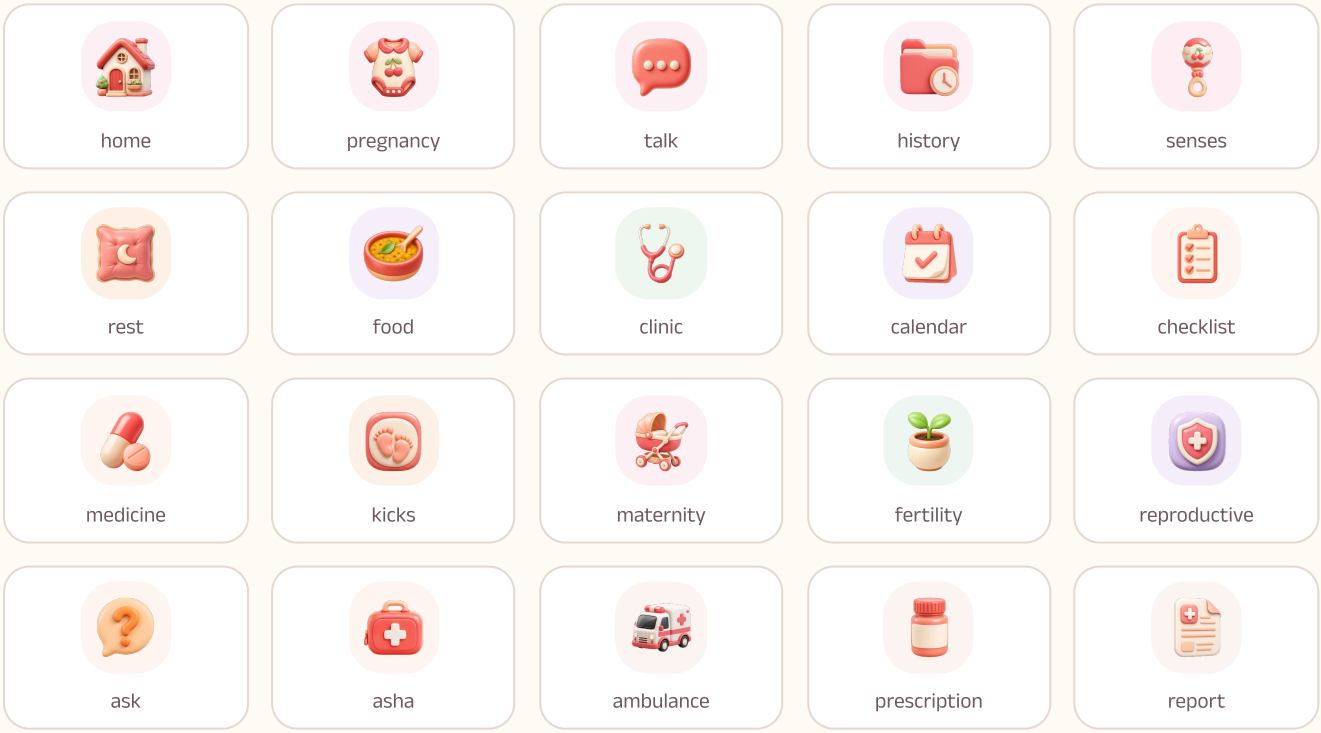

tara's icons are soft 3D clay objects: rounded, toy-like, lit gently from above, in coral, peach and cream. They feel friendly and tangible, never clinical. **Every meaningful icon in the product comes from this one family.**

## The navigation set

Active tab: full colour, lifted 2 pt, in a Rose tint capsule (#FDF0F5), label in Ink 600. Idle tabs: icon at 55 % opacity, label in Muted.

## The full family (20)

**DO**

- Sit an icon in a soft well: radius ≈ 30 % of the well, in the card's tint (or Porcelain/White on tinted cards).
- Sizes: tab bar 28 pt · list rows 34–40 pt in a 52 pt well · grid badge 32 pt in a 38 pt well · inline 18–20 pt.
- One icon per card or row. Name the icon after the action or topic, not the object.
- Small utility glyphs (chevron, close, check, download, phone) may be thin line icons, ≤ 20 pt, in Cherry or Muted. They are affordances, not illustrations.

**DON'T**

- [ ] Mix in emoji ( 🌸 ⚠️ 🍓 ) or flat/line pictograms for features and navigation.
- [ ] Show pregnant-woman figures in the mother's app (they are reserved for ASHA materials).
- [ ] Use alarm imagery (red warning triangles, sirens) on mother screens.
- [ ] Recolour, outline, add drop shadows or place clay icons on dark backgrounds.

# Making a new icon

Every icon was generated with Canva AI and finished the same way. Follow this recipe so a new icon is indistinguishable from the existing twenty.

## 1 · Prompt template

```
Cute soft 3D clay render of [ONE OBJECT, e.g. "a baby bottle with a small heart"],
rounded chunky toy-like shapes, matte clay texture,
colour palette: coral rose #E9707A, soft peach #F4B39A, warm cream #F6E7D7
(+ one small leaf-green or lavender detail only if the object needs it),
single object, centered, three-quarter front view, gentle soft studio light from top-left,
subtle soft shadow on the object only, no text, no letters, no people,
plain white background, minimal, modern 2026 app icon style
```

### Prompt rules

- One object only, and one idea: "clipboard with three ticks", not "a health dashboard".
- Prefer objects from Indian daily life (dal bowl, steel tiffin, rattle) over Western symbols.
- No faces on objects; babies only in the baby art set (section 07).
- Medical objects stay friendly: a stethoscope, not a syringe; a pill pair, not a pill bottle full of pills.

### Review checklist

- Reads at 28 pt (squint test on a phone).
- Dominant colour is coral/rose, secondary peach/cream.
- Same light direction and softness as "home" and "checklist".
- Nothing scary, nothing clinical, nothing gendered beyond the brand palette.

## 2 · Production pipeline

| STEP | TOOL | OUTPUT |
|---|---|---|
| 1 Generate (square 1:1) | Canva AI image generator | Clay render on white |
| 2 Remove background | Canva background remover | Transparent image |
| 3 Place full-size | Canva asset sheet "Tara app illustrations", 512 × 512 page | One page per icon |
| 4 Export | PNG, transparent background, 512 px | Full-resolution master |
| 5 Finish | Trim transparent margins, pad 8 % on each side, square | Even optical size |
| 6 Ship | WebP q88: icons 192 px (5–10 KB) · art 400–480 px (12–27 KB) | `assets/images/icons/<name>.webp` |
| 7 Register | `APP_ICONS` in `src/components/system/app-icon.tsx` | `<AppIcon name="…" />` |

## Naming

Lowercase single words describing the meaning: `checklist`, `kicks`, `clinic`. Art uses `w<week>-<fruit>` for size art and `baby-<stage>` for baby art.

# Illustration

The same clay world as the icons, a little larger and more emotional. Two families: **the baby**, who speaks to the mother, and **the size fruit**, which makes growth concrete.

## The baby, by stage

**Weeks 4–13**
Curled up, fast asleep

**Weeks 14–23**
Sucking my thumb

**Weeks 24–33**
Eyes open, waving

**Weeks 34–40**
Cosy, almost ready

Always on a cream cloud, inside a Rose tint disc (#FDF0F5). The baby speaks in first person ("Amma, this is me at week 30!").

## Size fruit (local produce, by week)

4 · poppy seed

8 · rajma bean

12 · lime

16 · mango

20 · banana

24 · corn cob

28 · brinjal

32 · coconut

36 · papaya

40 · watermelon

## Baby art prompt

```
Adorable soft 3D clay toy figure of [a tiny baby curled up asleep | a baby sucking its thumb |
a baby with big open eyes waving one hand | a chubby happy baby under a soft rose blanket],
lying on a cream cloud cushion, pastel peach skin, rose and cream colour palette,
minimal cute character design, centered, plain white background, soft studio lighting
```

Avoid the words "pregnancy", "foetus", "womb" and "born" in prompts (they trigger safety filters and medical-looking results). Keep babies cute and toy-like, never anatomical.

**DO**

- Warm, toy-like, rounded, softly lit.
- Local food and objects.
- Plenty of porcelain space around art.

**DON'T**

- Stock photos of patients, hospitals or needles.
- Pregnant-body imagery for mothers.
- Realistic or medical renders of the baby.

# Layout

**24 pt**
Side gutter (32 on tablets)

**520 pt**
Max column (720 on tablets ≥ 768)

**16–20 pt**
Gap between sections

**56 / 44**
Primary button height / min touch

| RADIUS | USED FOR |
|---|---|
| **14–16 pt** | Small wells, chips, date tiles, buttons inside cards |
| **18 pt** | Grid tiles, list rows, topic cards |
| **20–24 pt** | Main cards, story banner, bottom sheets (top corners), speech bubbles |
| **28 pt (pill)** | Primary 56 pt button, pills, capsules |

Separation by whitespace and 1 px hairlines (#E5D8D0 or ink at 10 %). Shadows are rare and very soft (ink, 4 % opacity, 12 pt blur).

## Core components

See my day, Lakshmi

Primary: Cherry, white 600 text, 56 pt, full width, sticky at the bottom. One per screen.

Call

Secondary: White with a 1.5 pt Cherry outline.

21 OCT — **Doctor visit** — Dr. Anand Kumar · Hosahalli PHC — PDF

History card: a fixed date tile anchors every record; no icons, no readings. Medical values live in the PDF.

BABY'S SENSES

**Sees the light**
Baby blinks toward light.

YOUR BODY

**Rest on left side**
Helps blood flow.

NUTRITION

**One extra meal**
Ragi, dal, banana.

CLINIC CARE

**Third check-up**
At your clinic.

Weekly grid: strictly 2 × 2 equal tiles (164 pt high), identical anatomy, text never resizes a tile. Tap opens a bottom sheet.

# Motion

Botanical: things grow and settle like a leaf. Springs overshoot a few percent and come to rest; nothing snaps, flashes or bounces hard.

## Tokens

| TOKEN | VALUE | USED FOR |
|---|---|---|
| **Tactile spring** | `stiffness 300 · damping 25 · mass 0.8` | Button press, entrances, toggles |
| **Glide spring** | `stiffness 280 · damping 28` | Page and tab slides, the baby's arrival |
| **Leaf spring** | `stiffness 140 · damping 15` | Brand intro: the leaf travels into the logo |
| **Settle curve** | `cubic-bezier(0.22, 1, 0.36, 1)` | Fades and reveals |
| **Breathe curve** | `ease-in-out sine, 3000 ms` | Idle loops (scale 1 ↔ 1.03, y 0 ↔ −4 pt) |
| **Press** | `scale 0.97 (tiles 0.96)` | Every tappable surface |
| **Stagger** | `60 ms per item, y 24 → 0` | Lists and grids entering |
| **Sheet** | `y 100 % → 0, background scale 0.96` | Bottom sheets and pickers |

## Signature moments

### Brand intro

The leaf breathes as a pre-loader, pops, travels into the wordmark; letters t-a-r-a rise in 70 ms steps; the figure draws upward; a bloom wipe reveals Welcome.

### "Amma, this is me"

The week's baby glides in from the right, the halo ripples once, the speech bubble pops, the size fruit springs in. Swipe or Next; then fade to the dashboard.

### Week story

Fruit glides between weeks; the quote rewrites word by word with a light shimmer. Future weeks stay locked.

### Small wins

A fully ticked day releases a 10-particle burst (720 ms, one value drives all) and "All done for today".

# Haptics and performance

Every primary gesture is paired with a haptic, and every animation is built to stay smooth on a low-cost Android phone.

## Haptics

| STRENGTH | WHEN |
|---|---|
| **Light / select** | Toggles, ticks, tab switch, week step, chips |
| **Medium** | Primary buttons, "Next", opening a call or a session |
| **Success** | Saving, finishing the intro, completing the day |
| **Warning** | Validation errors (ASHA/doctor flows only, never to alarm a mother) |

## Performance and access rules

- Animate only **transform** and **opacity**, on the UI thread (Reanimated). Never width, height or margin.
- Infinite loops pause when their screen is hidden; one-shot animations snap to their final state on blur and repaint on focus, so a screen can never be left blank.
- Respect Reduce Motion: no travel or scaling, only short cross-fades.
- Art and icons ship as small WebP files (5–27 KB) and are preloaded around the current week only, keeping memory low.
- One shared value drives a whole effect (e.g. all 10 burst particles) instead of one animation per element.

## Accessibility checklist

- Touch targets at least 44 × 44 pt; primary button 56 pt.
- Every icon-only control has a spoken label ("Call Sunita", "Skip to my dashboard").
- Text scales with the phone setting; layouts wrap instead of clipping.
- Meaning never relies on colour alone: always a word or icon too.
- Live updates (Tara's status, the intro bubble) are announced politely.
- Works in Kannada, Hindi and English, and with Reduce Motion on.

# How tara speaks

Like a kind, well-informed elder sister: short sentences, everyday words, one action at a time. Kannada, Hindi and English carry the same warmth.

**To the mother**
Warm, personal, reassuring. "Amma", her name, her baby in first person. Never risk scores, never "danger", never readings out of context.

**To the ASHA**
Practical and direct. What to do, for whom, by when. Risk is named clearly so she can act.

**To the doctor**
Clinical and precise. Rule codes, values, thresholds, transcripts.

## Write it like this

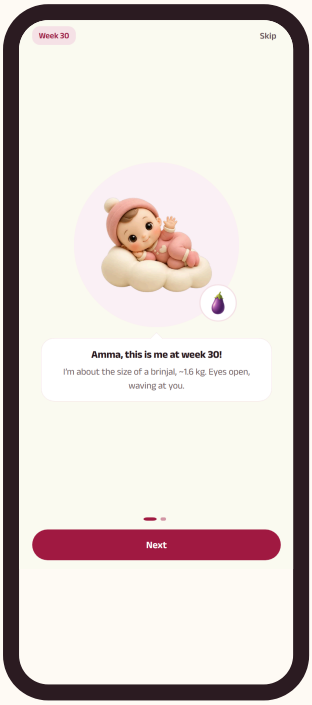

| INSTEAD OF | TARA SAYS |
|---|---|
| ⚠️ CLINIC VISIT NEEDED TODAY: danger signs found. | **Next visit · Today, 14:00** · Hosahalli PHC · with Sunita |
| Referral | **Doctor visit** |
| Your baby can tell light from dark. | **Amma, I can tell light from dark!** (the baby speaking) |
| Fetal weight estimate: 1.6 kg. | **I'm about the size of a brinjal, ~1.6 kg.** |
| Error: record not found. | **We couldn't load your details.** Your records are safe. Tap below to load them again. |
| Task completed successfully. | **All done for today** · 4-day streak |

## Principles

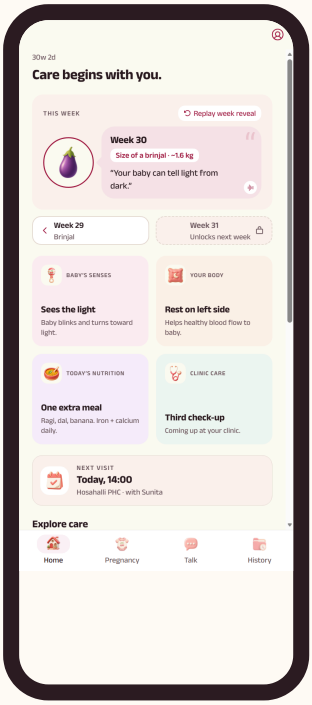

- **Plain words.** "Tablet", "check-up", "baby kicks"; not "IFA supplementation".
- **One idea per line.** If it needs two sentences, the second is the action.
- **Local and kind.** Brinjal, ragi, dal; Amma; the ASHA's first name.
- **No emoji in the interface.** Warmth comes from words, art and colour.
- **Privacy first.** Medicine names and readings stay inside PDFs on a shared phone.
- **Never frighten.** Safety guidance (call 108, call your ASHA) is calm and specific.
- **Guidance, not diagnosis.** "Tara gives general guidance, not a diagnosis."
- **Voice belongs to Sakhi.** Read-aloud lives in the ASHA's Sakhi session.

# The mother's app

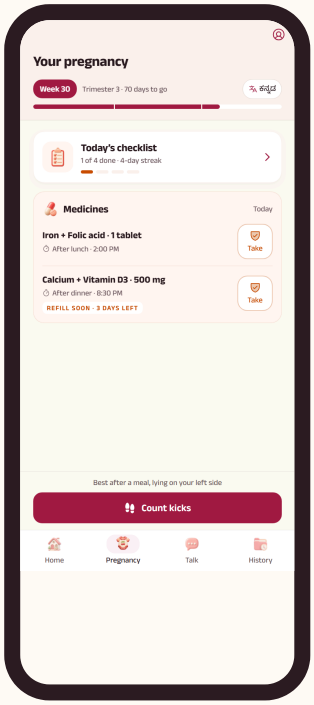

Every rule in one place: porcelain canvas, one cherry action, clay icons in tinted wells, Anek type, calm words.

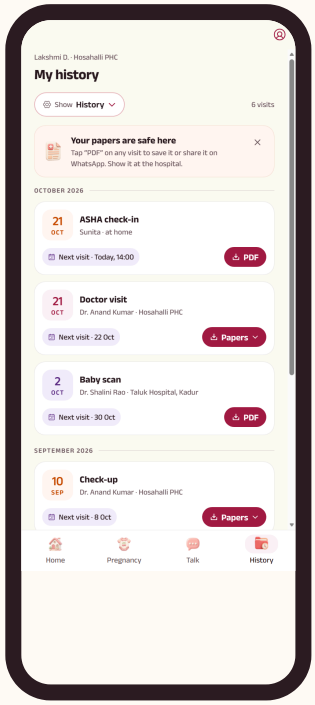

Intro · "Amma, this is me"

Home · week story + grid

Pregnancy · checklist + medicines

History · date-first cards

## What makes it tara

### 1 · Calm canvas

Porcelain everywhere; tints only to group; cherry only on the next action.

### 2 · Friendly objects

Clay icons and a clay baby instead of medical symbols.

### 3 · Kind words

Her name, her baby's voice, her ASHA's name, never alarm.

# Cheat sheet
