Tara · Sakhi — mock data used in the app

Every piece of sample (mock) data the Tara app ships with, taken directly from the app's code on 04 Nov 2026, 15:59. None of it is real patient data: names, phone numbers, readings and visits are invented for the demo and pilot rehearsals.

Where it lives: `app/src/data/` (store, care network, screening, clinical entry, pregnancy, visits, SOS, care plan, Tara replies) and the doctor's draft advice in `app/src/app/doctor/case/[id].tsx`. The voice recordings of Sakhi's lines are in `app/assets/voice/` (not listed here). "Restore sample women" / "Reset demo data" in the app puts all of this back.

Contents

1. Care network: PHC, villages, staff, visit slots and messages
2. Sample mothers (the ASHA's and doctor's demo women)
3. Voice questionnaire (question bank, per visit)
4. Screening rules and Sakhi's replies
5. Clinical entry form (what the ASHA enters)
6. Mother app: visits, medicines, baby, topics, checklist, Tara
7. SOS: responder roster and settings
8. Doctor: draft advice

1. Care network: PHC, villages, staff, visit slots and messages

> From `data/care-network.ts`. Dates are made relative to the day the app is opened; shown here relative to the day this PDF was generated.

3 weeks ago	no	All answers normal
7 weeks ago	no	All answers normal

Doctor's advice

1. Come to the PHC today so the doctor can check your blood pressure again.
2. Rest lying on your left side and avoid heavy work until you are seen.
3. Call 108 at once if the headache gets worse, your vision gets worse, or you have a fit.

Daily checklist (care plan)

Iron tablet after lunch, Count 10 baby kicks, 30 min gentle walk, 8 glasses of water

Topic: Maternity

Week by week care for you and your baby.

Card	Urgent	Tips
Danger signs	yes	Bleeding, severe headache, blurred vision or fits: call 108 now., Swollen face or hands, or the baby moving less: tell your ASHA today., High fever or water leaking: go to the PHC today.
Eating well	—	One extra meal a day., Greens, dal, eggs or milk daily., Iron tablet after food, not with tea.
Baby movements	—	From 28 weeks, count 10 kicks in 2 hours., Fewer kicks than usual? Lie on your left side and count again., Still fewer: call your ASHA.
Sleep and rest	—	Sleep on your left side., Rest for an hour after lunch., Avoid lifting heavy water pots.
Tablets and injections	—	Iron and calcium every day., Two tetanus injections in pregnancy., Ask before taking any other medicine.
Hospital bag	—	Mother card and ID., Two clean saris, baby clothes, cloth pads., Keep the 108 number and ASHA number written down.

Topic: Fertility

Plan a healthy pregnancy, when you are ready.

Card	Urgent	Tips
Your cycle	—	A cycle is usually 21 to 35 days., The fertile days are about 2 weeks before the next period., Irregular cycles are common; tell a doctor if they stop for 3 months.
Folic acid	—	Start folic acid 3 months before trying., It protects the baby's brain and spine., Free at your PHC.
Healthy weight	—	Very low or very high weight can delay pregnancy., Eat regular meals with protein., Walk 30 minutes most days.
When to see a doctor	—	No pregnancy after 1 year of trying (6 months if over 35)., Very painful periods or no periods., Both partners can be checked.
Myths and facts	—	Not getting pregnant is not only the woman's problem., Papaya in normal food amounts is safe., Stress alone rarely causes infertility.

Topic: Reproductive health

Periods, infections, family planning and your rights.

Card	Urgent	Tips
Periods and hygiene	—	Change pads every 4 to 6 hours., Wash cloth pads with soap and dry them in the sun., Bleeding for more than 7 days: see a doctor.
Signs of infection	yes	Itching, bad smell or unusual discharge., Pain when passing urine, or fever with lower belly pain., Treatment is simple and private at the PHC.
Family planning	—	Space children at least 2 years apart., Options: pills, Copper-T, injections, condoms., All free and confidential at the PHC.
Screening	—	Cervical screening from age 30., Check your breasts once a month., Ask your ASHA about the next camp.
Your rights and privacy	—	Your health information is yours., You can ask for a woman doctor or nurse., Nothing you read here is saved or shared.

Daily checklist presets

ID	Task	Icon
iron	Iron tablet after lunch	medicine
calcium	Calcium tablet after dinner	medicine
kicks	Count 10 baby kicks	kicks
walk	30 min gentle walk	maternity
water	8 glasses of water	food
meal	One extra meal	food
rest	Rest 1 hour on left side	rest

Default plan: iron, kicks, walk, water. At most 8 items.

Tara (mother's assistant): suggested questions

Is swelling in my feet normal?, What should I eat this week?, My baby is moving less, When should I call 108?

Tara's canned answers

Matches words	Answer	Urgent
bleed, fit, convuls, blur, severe headache, water leak, 108, emergency	Call 108 at once if you have bleeding, a fit, severe headache, blurred vision or water leaking. Then tell your ASHA. Do not wait.	yes
moving less, kick, movement, not moving	Lie on your left side, drink a glass of water and count the kicks for 2 hours. Fewer than 10? Call your ASHA now; she will help you reach the PHC.	yes
swell, feet, oedema, edema	Some swelling of the feet late in pregnancy is common. Rest with your feet up. But if your face or hands swell, or you have a headache, tell your ASHA today.	no
eat, food, diet, meal, hungry	Add one extra meal a day: greens, dal, an egg or milk, and fruit. Take your iron tablet after food, not with tea.	no
sleep, tired, rest	Sleep on your left side and rest for an hour after lunch. Feeling tired is normal; feeling breathless or dizzy is not, so tell your ASHA.	no
tablet, iron, calcium, medicine	Take one iron tablet and one calcium tablet every day, at different times. Ask your doctor before taking any other medicine.	no

Anything else: "I have noted your question and shared it with Sunita, your ASHA worker. She will answer at her next visit, or sooner if it is urgent."

8. Doctor: draft advice

> From `app/doctor/case/[id].tsx` : what the doctor's advice box starts with before he edits it.

High risk (draft advice)	high, normal, Come to the PHC today so the doctor can check your blood pressure again., Rest lying on your left side and avoid heavy work until you are seen., Call 108 at once if the headache gets worse, your vision gets worse, or you have a fit.
Routine (draft advice)	Keep taking your iron and calcium tablets every day., Eat one extra meal a day with greens, dal and milk., Your next check-in with your ASHA worker is in 2 weeks.
